

A close-up photograph of a woman with light brown hair, wearing a blue textured knit sweater, sitting in a hammock. The hammock is made of thick, light-colored ropes. The background is a soft-focus green, suggesting an outdoor setting. The lighting is natural and bright, creating a serene atmosphere.

HESPERIOS

A HOME FOR CURIOUS MINDS

Hesperios is a multidisciplinary design and wellness brand
informed by physics, nature, and art.

Founded in 2016 by naturalist and designer Autumn Hrubý, we
create products, places, and experiences defined by warmth,
comfort, intelligence, and well-being.

HESPERIOS

KNIT LIBRARY, 2026
MENS

HESPERIOS KNIT LIBRARY IS AN EVOLVING
COLLECTION OF HEIRLOOM KNITS. OVER
ONE HUNDRED ORIGINAL PATTERNS
CRAFTED FROM FINE NATURAL FIBERS,
PRODUCED IN PERU AND THE USA.

HESPERIOS

HESPERIOS KNIT LIBRARY IS A LIFE PARTNER

YOU'LL SPEND DECADES OF YOUR LIFE IN OUR SWEATERS

Hesperios Knit Library is an evolving collection of tailored, heirloom essentials—over one hundred original patterns in 100% baby alpaca and natural fibers developed with master artisans and rendered in our signature palette. Produced in Lima and New York.

We make enduring pieces—classic, playful, and modern silhouettes for all bodies and ages—in baby alpaca, silk, cashmere, and pima cotton. Our philosophy honors textile tradition and collaboration; we work outside seasonal churn, at a deliberate rhythm, partnering only with farms and factories that share our values: respect for nature, animal welfare, and integrity at every stage.

HESPERIOS

DEFINED BY UNCOMPROMISING QUALITY, RIGOROUS DESIGN, AND DEVOTION TO CRAFT

Hesperios and Hesperios Foundation exist to improve the quality of life, grounded in a simple truth: No one can be well at the expense of the natural world.

Through Hesperios and The Hesperios Foundation, we design and produce enduring objects of wellness-luxury knitwear, modular lighting, printed matter, and home wares—built for daily use, care, and repair.

Guided by beauty, utility, and stewardship, we're building a business that does well by doing good: supporting craft, protecting the environment, and scaling real impact with an exceptional team.

HESPERIOS

THE STORY OF WOOL

Early History and Scientific Discoveries

When considering wool, few imagine ancient Mesopotamia. Yet it was there—where writing, cities, and the wheel were born—that humans first spun fine threads from the fleece of sheep. On the same plains that gave rise to Gilgamesh, wool emerged not only as a utilitarian material but as an essential textile of civilization.

Surpassing its predecessors—flax and animal hides—wool became the defining fiber of Bronze and Iron Age Eurasia. Techniques for felting, dyeing, and weaving proliferated across cultures. Wool garments became so indispensable that, centuries later, the export of Merino sheep from Spain was punishable by death.

Wool's appeal was immediate: warm, resilient, and endlessly renewable. Unlike skins, wool could be shorn seasonally without harm to the animal. This quiet sustainability became a necessary element of agrarian life—textile arts began to appear in mythology, scripture, and folktales. But what explains its modern relevance? Why, in a world of synthetic innovation, do mountaineers, firemen, and Nordic fishermen still reach for wool?

Science offers answers. Over the past century, physicists and chemists have revealed that wool is not merely functional but structurally sound. Its crimped fibers create microscopic air pockets that trap heat, giving wool unmatched insulating power without bulk. On a molecular level, it is composed of keratin proteins, which feature polar groups that attract water molecules. This allows wool clothing to absorb up to 30% of its weight in vapor without feeling damp.

Wool enhances comfort and dryness by drawing moisture away from the skin. And the process is exothermic—it releases heat as it absorbs moisture. This subtle thermal exchange, called conditioning, allows wool to regulate body temperature naturally.

Its other attributes are no less compelling: flame resistance, elasticity, resistance to wrinkles and water-based stains, and natural ultraviolet protection. Wool stretches and recovers like skin. It protects without suffocating. It breathes.

Modern studies extend even into the therapeutic. Research from Australia's CSIRO has shown that superfine Merino wool can soothe eczema and reduce skin irritation, once again connecting the ancient fiber to contemporary well-being. Wool, in essence, is a living material—responsive, sensory, and comfortable. Designed by nature to shield animals from extremes, it also protects the human body.

THE STORY OF WOOL

Baby Alpaca Wool: A Natural High-Performance Fiber

Baby Alpaca is one of the finest grades of alpaca fiber, sheared from the softest parts of the adult alpaca, not from newborns, as the name suggests. Prized for its exceptional softness and smooth texture, Baby Alpaca is often compared to cashmere and is significantly more durable, thanks to its higher tensile strength and resistance to pilling. Naturally hypoallergenic due to the absence of lanolin, Baby Alpaca is ideal for sensitive skin and requires less chemical processing. It is also thermo-regulating, providing insulation in cold and breathability in heat. Baby Alpaca is stronger, warmer, and lighter than most sheep's wool and naturally resists water and odors. It occurs in an extraordinary range of 22 natural colors—the broadest spectrum among natural fibers—spanning ivory, taupe, browns, silvers, greys, and true black. This spectrum reduces the need for synthetic dyes and underscores its sustainability.

Natural UV Protection

Wool offers inherent sun protection. According to the International Wool Textile Organisation (IWTO), wool garments often possess a Ultraviolet Protection Factor (UPF) of 20–50, depending on density and treatment—making it ideal for outdoor and high-altitude clothing.

Fire Resistance

During World War II, wool became the material of choice for military uniforms. Unlike synthetic fibers, it does not melt or drip when exposed to high heat; instead, it chars, forming a protective barrier that helps block oxygen and slow the spread of flames. Wool also has a high ignition temperature—between 570 and 600°C—making it less likely to catch fire under ordinary conditions.

COLORWAYS

Baby alpaca occurs in twenty-two natural shades.

Beyond these, Hesperios has composed custom-dyed colorways in our signature house palette:

A young man with shoulder-length brown hair and a serious expression is the central focus. He is wearing a dark, long-sleeved button-down shirt. The background is dimly lit, featuring a wall-mounted lamp with a warm glow on the left and a dark wooden structure, possibly a doorway or a large mirror frame, behind him. To the right, a mirror reflects the man's profile, showing the back of his head and the side of his face. The overall mood is somber and contemplative.

HESPERIOS

A landscape photograph of a marsh. In the foreground, there are tall, golden-brown grasses with feathery seed heads, some in sharp focus and others blurred. The middle ground shows a calm body of water reflecting the sky, surrounded by green marsh vegetation. In the background, there is a dense line of trees under a clear, light blue sky. The overall scene is peaceful and natural.
